

Paper Dragon

You will need this template, kid scissors, crayons or markers, and a stapler.

1. Color the dragon's head and tail and cut them out. Color the other side of the head and tail to match.
2. Color the wings, but leave the body blank. Cut out the wings and turn them over. Now color the body, leaving the wings blank.
3. Fold the wings in half, colored side together.

4. Now fold the wings down, along the dotted lines.

5. Put the head in the open fold between the wings. Staple the sides together. Do the same with the tail.
