22-year-old Selina was diagnosed with sickle cell anemia at two weeks old. As a result of this serious blood disorder, she also transmitted a rare brain disease and had a stroke when she was just 10-years old. Selina receives monthly blood exchanges where a portion of her sickle cell blood is removed and replaced with healthy blood. Selina loves music, playing on the Wii U, and spending time with her family. Her life is made possible by generous blood donors.

The mission of Cayenne Wellness is to increase the quality of life for individuals diagnosed with sickle cell disease in California by ensuring expert, unbiased, and comprehensive care.

Arrive hydrated. Photo ID Required.
