

# Researching your *Family Roots*

## Genealogy Research

Hands on Computer Workshop Learning Tips and  
Tricks for the Genealogy Website FamilySearch.org

Thursday, August 8th • 10:00 - 11:30 a.m.  
4th Floor, Wells Fargo Technology Center

This workshop is hands on in our computer lab  
learning how to use the website, search for  
ancestors' records, and build a family tree using  
the free genealogy website FamilySearch.org.

- Hands-on experience with computers provided in class.
- Step-by-step guidance through processes.
- Bring birth, marriage, and death dates/locations of ancestors for tree building.
- Topics cover key features of the site:
  - \* Vast global records
  - \* Millions of digitized historical documents
  - \* Collaborative family tree of ancestral information
  - \* Platform for creating individual trees
  - \* Tools for tracing family history
  - \* Research assistance: guides, tutorials, help center
  - \* Build a small family tree
