

San Diego Residential Lead Abatement Program

*Funded as part of a lawsuit settlement, the San Diego Residential Lead Abatement Program (SDRLAP) remediates lead hazards in private residential structures throughout the City of San Diego. Services are conducted, **CONFIDENTIALLY**, at little or no cost to owners of eligible properties.*

DANGERS OF LEAD POISONING

- Childhood lead poisoning is the **No. 1 environmental health problem** facing children today.
- **Deteriorated lead paint is the primary source of childhood lead poisoning.** Even small levels of lead in a child's blood can do permanent damage including developmental and behavior problems.
- Childhood lead poisoning is an environmental health problem that causes adverse effects on children's development and later in adulthood. In San Diego County, between 2017 and 2021, **231 children under the age of 6 received services from the San Diego County Childhood Lead Poisoning Prevention Program (CLPPP)** due to lead poisoning.
- **28% of lead-poisoned people in San Diego live in homes** in which lead-based paint or contaminated dust is a possible source.

WHO IS ENCOURAGED TO APPLY FOR THE SDRLAP?

- **Housing built prior to 1960.**
- **Or housing built prior to 1979 with a child less than 6 years of age who lives in, or otherwise frequently visits, who has detectable levels of lead in their blood based on a venous blood draw.**
- **Or any housing built prior to 1979 with a resident child less than 18 years of age with levels of lead in their blood at or above 5 micrograms per deciliter based on a venous blood draw.**
