## Microscopes with Garden Bugs

Join us for a fun, informative, and fascinating look into insects commonly found in gardens!

We're exploring garden creatures, ranging from squirmy worms that help our soil to quirky potato bugs that can be both a gardener's friend and foe. Come ready to explore, inquire, and discover a new appreciation for the little critters that play a large role in our gardens. It's going to be a bug-tastic time!

**Registration is encouraged.**
